### **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions and listings of claims in the application:

### **Listing of Claims:**

- 1. (canceled)
- 2. (previously presented) The method of claim 29 wherein the terpene-phenol resin comprises from about 1 to about 40 % by weight of phenol as measured by weight of the compound.
- 3. (previously presented) The method of claim 29 wherein the terpene-phenol resin comprises from about 5 to about 20 % by weight of phenol as measured by weight of the compound.
- 4. (currently amended) The method of claim 29 wherein the phenol-containing compound is present in the biodegradable polymer or biodegradable polymer composition at from about 0.5 to about 10 weight % as measured by the total weight of the biodegradable polymer or biodegradable polymer composition.
- 5. (currently amended) The method of claim 29 wherein the phenol-containing compound is present in the biodegradable polymer or biodegradable polymer composition at from about 1 to about 3 weight % as measured by the total weight of the biodegradable polymer or biodegradable polymer composition.
- 6. (canceled)
- 7. (currently amended) The method of claim 29 wherein the aliphatic aromatic copolyester and wherein R<sup>11</sup> and R<sup>12</sup> are the same or different, and are selected from the group consisting of residues of one or more of diethylene glycol, propylene glycol, 1,3-propanediol, 1,3-butanediol,

#197167 - 2 -

and 1,4-butanediol, R<sup>13</sup> is selected from the group consisting of malonic acid, succinic acid, glutaric acid, adipic acid, pimelic acid, 2,2-dimethyl glutaric acid, diglycolic acid, and an ester forming derivative thereof, and R<sup>14</sup> is selected from the group consisting of one or more of 1,4-terephthalic acid, 1,3-terephthalic acid, 2,6-naphthoic acid, 1,5-naphthoic acid, and an ester forming derivative thereof.

#### 8. (canceled)

9. (currently amended) The method of claim 29, wherein the biodegradable polymer or biodegradable polymer composition <u>further</u> comprises one or more of: a pigment, a dye, an opacifying agent, an antioxidant, an ultraviolet stabilizer, an optical brightener, an aliphatic acid, a metal salt, an antistatic agent, an antiblocking aid, a filler, a dispersing agent, a coating aid, a slip agent, a lubricant, starch, wood, and flour.

#### 10. - 23. (canceled)

- 24. (previously presented) The biodegradable polymer composition of claim 30 wherein R<sup>11</sup> and R<sup>12</sup> are the same or different, and are selected from the group consisting of residues of one or more of diethylene glycol, propylene glycol, 1,3-propanediol, 1,3-butanediol, and 1,4-butanediol, R<sup>13</sup> is selected from the group consisting of malonic acid, succinic acid, glutaric acid, adipic acid, pimelic acid, 2,2-dimethyl glutaric acid, diglycolic acid, and an ester forming derivative thereof, and R<sup>14</sup> is selected from the group consisting of one or more of 1,4-terephthalic acid, 1,3-terephthalic acid, 2,6-naphthoic acid, 1,5-naphthoic acid, and an ester forming derivative thereof.
- 25. (previously presented) The biodegradable polymer composition of claim 30 wherein the phenol-containing compound comprises from about 1 to about 40 % by weight of phenol as measured by weight of the compound.

26. (previously presented) The biodegradable polymer composition of claim 30 wherein the phenol-containing compound is present in the biodegradable polymer composition in amount of from about 0.5 to about 10 weight % as measured by weight of the biodegradable polymer composition.

- 27. (currently amended) The biodegradable polymer composition of claim 30 wherein the phenol-containing compound is present in the biodegradable <u>polymer</u> composition in an amount of from about 1 to about 3 weight % as measured by weight of the biodegradable polymer composition.
- 28. (currently amended) The biodegradable polymer composition of claim 30, wherein the biodegradable polymer composition further comprising comprises one or more of: a pigment, a dye, an opacifying agent, an antioxidant, an ultraviolet stabilizer, an optical brightener, an aliphatic acid, a metal salt, an antistatic agent, an antiblocking aid, a filler, a dispersing agent, a coating aid, a slip agent, a lubricant, starch, wood, and flour.
- 29. (currently amended) A method for preparing an article from a biodegradable polymer composition wherein the method comprises:
  - a. introducing a phenol-containing compound comprising terpene-phenol resin into a biodegradable polymer or biodegradable polymer composition comprising a biodegradable polymer having a degradation rate, wherein the phenol-containing compound is added in an amount sufficient to slow the degradation rate of the biodegradable polymer or biodegradable polymer composition; and
  - b. mixing the phenol-containing compound with the biodegradable polymer or biodegradable polymer composition thereby providing a biodegradable polymer composition;

wherein the biodegradable polymer or biodegradable polymer composition consists essentially of:

an aliphatic-aromatic copolyester having repeat units of the following

#197167 ~ 4 -

structures:

wherein

- (i) R<sup>11</sup> and R<sup>12</sup> are the same or different, and are residues of one or more of diethylene glycol, propylene glycol, 1,3-propanediol, 2,2-dimethyl-1,3-propanediol, 1,3-butanediol, 1,4-butanediol, 1,5-pentanediol, 1,6-hexanediol, 2,2,4-trimethyl-1,6-hexanediol, thiodiethanol, 1,3-eyelohexanedimathanol cyclohexanedimethanol, 1,4-cyclohexanedimethanol, 2,2,4,4-tetramethyl-1,3-cyclobutanediol, triethylene glycol, or tetraethylene glycol;
- (ii) R<sup>11</sup> and R<sup>12</sup> are 100% of the diol components in the copolyester;
- (iii)  $R^{13}$  is absent or is selected from one or more of the groups consisting of  $C_1$   $C_{12}$  alkylene or oxyalkylene;  $C_1$   $C_{12}$  alkylene or oxyalkylene substituted with one to four substituents independently selected from the group consisting of halo,  $C_6$   $C_{10}$  aryl, and  $C_1$   $C_4$  alkoxy;  $C_5$   $C_{10}$  cycloalkylene; and  $C_5$   $C_{10}$  cycloalkylene substituted with one to four substituents independently selected from the group consisting of halo,  $C_6$   $C_{10}$  aryl, and  $C_1$   $C_4$  alkoxy; and
- (iv)  $R^{14}$  is selected from one or more of the groups consisting of  $C_6$   $C_{10}$  aryl, and  $C_6$   $C_{10}$  aryl substituted with one to four substituents independently selected from the group consisting of halo,  $C_1$   $C_4$  alkyl, and  $C_1$   $C_4$  alkoxy; and
- c. forming the biodegradable polymer composition into an article, wherein the article comprises: a film, a bottle, a blow molded article, an injection molded article or a container, and wherein the article exhibits a delayed biodegradation rate over an article formed from a biodegradable polymer composition not

- 5 -

including the phenol-containing compound.

30. (currently amended) A biodegradable polymer composition for making an article comprising a film, a bottle, a blow molded article, an injection molded article or a container, wherein the biodegradable polymer or biodegradable polymer-second material composition comprises:

- a. a phenol-containing compound comprising terpene-phenol resin incorporated in the biodegradable polymer or biodegradable polymer-second material composition, the phenol-containing compound being present at an amount sufficient to slow the degradation rate of the biodegradable polymer or biodegradable polymer second-material composition; and
- b. a. a biodegradable polymer or biodegradable polymer-second material composition consisting essentially of:

an aliphatic-aromatic copolyester having repeat units of the following structures:

wherein

- (i) R<sup>11</sup> and R<sup>12</sup> are the same or different, and are residues of one or more of diethylene glycol, propylene glycol, 1,3-propanediol, 2,2-dimethyl-1,3-propanediol, 1,3-butanediol, 1,4-butanediol, 1,5-pentanediol, 1,6-hexanediol, 2,2,4-trimethyl-1,6-hexanediol, thiodiethanol, 1,3-eyelohexanedimathanol cyclohexanedimethanol, 1,4-cyclohexanedimethanol, 2,2,4,4-tetramethyl-1,3-cyclobutanediol, triethylene glycol, or tetraethylene glycol;
- (ii)  $R^{11}$  and  $R^{12}$  are 100% of the diol components in the copolyester:
- (iii) R<sup>13</sup> is absent or is selected from one or more of the groups consisting of C<sub>1</sub>

- $C_{12}$  alkylene or oxyalkylene;  $C_1$   $C_{12}$  alkylene or oxyalkylene substituted with one to four substituents independently selected from the group consisting of halo,  $C_6$   $C_{10}$  aryl, and  $C_1$   $C_4$  alkoxy;  $C_5$   $C_{10}$  cycloalkylene; and  $C_5$   $C_{10}$  cycloalkylene substituted with one to four substituents independently selected from the group consisting of halo,  $C_6$   $C_{10}$  aryl, and  $C_1$   $C_4$  alkoxy; and
- (iv)  $R^{14}$  is selected from one or more of the groups consisting of  $C_6$   $C_{10}$  aryl, and  $C_6$   $C_{10}$  aryl substituted with one to four substituents independently selected from the group consisting of halo,  $C_1$   $C_4$  alkyl, and  $C_1$   $C_4$  alkoxy; and
- b. a phenol-containing compound comprising terpene-phenol resin, wherein the phenol-containing compound is present in the biodegradable polymer composition at an amount sufficient to slow the degradation rate of the biodegradable polymer, and wherein the article exhibits a delayed biodegradation rate over an article formed from a biodegradable polymer composition not including the phenol-containing compound.
